

# *You Can Prevent Falls!*

*When you see a wet floor sign...*

**STOP** walking

**ASSESS** the area and your safety

**WAIT** if it's not safe

**PROCEED** with caution if it's safe

A wet floor sign means there's a

potential

**risk to your safety.**

*Leave it in place if the floor is wet.*

*Set it against a wall if the floor is dry.*

We can all **work together** to prevent falls by taking responsibility for safe, dry floors.
